The Experience Agenda

Monday and Tuesday | separate work

Students
Lectures

Professionals
Case Studies in
group

Wednesday and Thursday | joint work

Case Studies with combined
group Professionals + Students
(Firm simulation | Seniors + Juniors cooperating)

First and second day

Students:

- Follow lectures (provided by the six trainers from HEIs)

Professionals:

- Follow a remote E-learning path before the event
- They are assigned to solve one of the three case studies
- Teams will form and each of them will approach the case with their own competences and skills

Third and fourth day

Students and professionals together

- The **students** are introduced to the Case study and participate in its resolution
- **Professionals** present themselves the Case study to the coming students, pointing out the topics and the type of subject involved
- The **students** will bring their contribution, fresh from their courses and their theoretical background, while the **professionals** will have the occasion to simulate and instantly evaluate their managerial approach.

Case studies

Three Case studies are given, representing the three Curriculum paths:

- **Engineering track** (Hera)
- **Financial track** (SMEs)
- **Climate & Business track** (Tauron)

Note: an effort from the Trainers has to be made in order to provide a **strong link** between the topics of the (E-learning) lectures and the Case studies
