Update of KPIs and evaluation reporting

Régis Gourdel & Irene
Monasterolo

GrEnFin Steering committee
meeting

November 24, 2021

With the support of the
Erasmus+ Programme
of the European Union

Issues with the evaluation

- Normalized KPIs not adapted to reporting to the EACEA
- Summary report should be largely self-contained
- Previous KPIs:
 - Dispersed between different versions
 - Insufficiently defined scope of applicability (deliverables)
 - Methodology undefined ex ante
 - Redundancies between and within working packages
- Possible issues in the self-evaluation of WP10 reports

Solutions found

- Report all KPIs on own scale, with no harmonization applied
- No comparison to targets
- Set of project-wide KPIs that were used across WPs: flexibility for all standards KPIs - mostly quantitative - to be used wherever applicable
- Clarification of which KPIs are *quantitative*, *binary* (something is delivered or not) or *qualitative*
- Evaluations of past deliverables are not affected

Common KPIs

Number	Title
PI 0.1	Rate of challenges emerged/solved
PI 0.2	Respect of the deadline declared into the project
PI 0.3	Number of questionnaires submitted
PI 0.4	Response rate
PI 0.5	Number of downloaded documents from the platform
PI 0.6	Average appreciation score
PI 0.7	Number of applications
PI 0.8	Number of attendants

Methodological details

General approach:

- for quantitative KPIs: measures are defined clearly, as well as the source of data if ambiguous,
- for qualitative KPIs: the criteria applied are explicated, with possibly several combined in one KPI.

Example: PI 0.7 – Number of applications:

Total number of application received for any part of the GrEnFin program that requires it. The number shall be put into comparison with the maximum capacity of the program and complemented by key statistical information about applicants (e.g. countries of origin)
