

Greening Energy Market  
and Finance

# Introduction to GrEnFin

# The GrEnFin project

- International curriculum to train Sustainable Energy experts
- Blends technical issues on green energy and sustainable finance, quantitative analysis and topics in economic policy and business
- Elaborated by a consortium of European universities and industry partners
- For master-level students and professionals
- Leading to the development of a joint master degree

# The 2021 Summer School

- In Katowice (Poland)
- Over a week, in June 2021
- Series of lectures and applied group projects
- ECTS credits awarded for successful completion
- WU can subsidize five students (transport and accommodation)
- Details to come beginning of 2021

# Summer School courses: 2020 program (indicative)

- Extreme natural risk and finance in ambiguous settings
- Climate change and financial risks
- The transition risk and the regulations: Green bonds and beyond
- Smart Grids for Smart Cities: the Potential of Local Energy Communities
- The Outlook of Energy Markets in Q2 -2020
- Power to Gas and Decarbonisation pathways
- Adaptation to climate change in practice
- Energy trading and economic evaluation of risk
- Teamwork: climate change assessment at the point of building a new solar farm at a given location
