- P14 - Speed Development Consultants (SPEED) – Greece

Within the next 3 years, GrEnFin KA/ERASMUS+ project aims to design, test and pilot a joint/multiple educational path and a professional module targeted to a new professional figure, i.e. the Energy Expert. Given his expected key role in favoring the transition to a more sustainable economy, the EE must combine a number of competences usually belonging to different profiles as the engineering knowledge of the green sources of energy, the competences in sustainable economy and the quantitative skills in risk management and financial engineering. As matter of fact we believe that only this interdisciplinary approach could allow HEIs to educate such a pivotal actor able to assure for a vital economy with an environment-preserving behavior. In the feasibility matter, the important role of the financial knowledge is discovered to be undeniable in order to realize the sustainable diversification of energy's supply thanks to a natural risk control policy and hedging.

Considering the objectives of the Project and in particular his commitment to face the new challenges of a transforming world with an inclusive global view by:

- Contributing to the decarbonizing process of the EU economy through investment in knowledge and competences for either high education and professional training in the Energy Sector
- designing an innovative and interdisciplinary European approach and framework to educate the "hero of the green economy", i.e. the Sustainable Energy Expert, having the pivotal role to assure for a vital economy with an environment-preserving behavior of companies and stakeholders
- developing and consolidating a long-lasting network and cooperation among industries and academia in the Energy Sector
- disseminating the best practices to address energy cross-border challenges in view of a sustainable development of the EU

CETENMA (Technology Centre for Energy and Environment) is a private, non-profit Business Association, founded in 2000. It was set up to support companies with technological research, development and innovation in all areas relating to Energy and the Environment, thereby assisting them in becoming more competitive. CETENMA R&D activities range over five main areas of Knowledge: Water Technologies, Waste treatment, Bioenergy, Renewable Energies and Energy Efficiency.

Considering the convergence between the objectives of the Project and the mission of the organisation I represent, by signing this Letter of Intent I hereby declare the intention of the organisation I represent to cooperate with the GrEnFIIn consortium and to become an associated partner of the Project. The organisation I represent agrees to:

1. Support the dissemination and exploitation of the GrEnFIIn project activities and results
2. Support the Project consortium in the identification of specific needs of the Energy Sector
3. Support the Project consortium giving advise and proposing adjustment of the course and the professional module
4. Participating in the Summer Schools to give specialized lectures or seminars in related fields
5. Provide Internship dedicated to GrEnFIIn students

Signing this letter of intent CETENMA authorizes the University of Bologna as the project applicant to publish the associated partner data provided in the Form enclosed, entirely or extracts, on the project related documents both on paper and on-line (e.g. project web site, etc.)
