1. Report on the validation's activities

In the context of the GrEnFin project, validation activities have been initially planned in order to test the proposed learning paths and the progress of the project. Such activities were expected to involve different stakeholders, also outside the project consortium (Umbrella organizations), to ensure both the suitability of the project objectives and the adequacy of the imagined learning curriculum. Examples of identified activities consisted of working days organized by Partners together with their stakeholders, as well as external validations of the proposed curriculum after the summer school and of the project's contents.

Unfortunately, the Coronavirus pandemic started in February / March 2020 has severely disrupted life and plans worldwide. The GrEnFin project is clearly no exception. While most of the activities were successfully transitioned to online mode, even in the first months of the pandemic, it has not been possible to do so for all of them. Hence, core activities such as project meetings and the summer school has been held via Teams, while the validation activities have been postponed given: i) the severe uncertainty around the possibility to organize physical events; ii) the organizational difficulties posed by online events; iii) the difficulties in reaching the audience necessary for the validation; and iv) the overwhelming situation that each partner was individually facing to deal with the pandemic impact in its normal course of operations.

For these reasons, no validation activities have been conducted so far. The project consortium is fully aware that validations activities are needed in order to ensure the success of the project and has already activated the necessary resources to make sure that, in the next months and despite the pandemic resurgence, said activities will be successfully conducted, either online or, where possible, in person.

We are trying to do as much as we can so that the next deliverables will not be missing trying to contact stakeholders even in an online mode if there is no possibility to see each other in presence.

All information about the taken actions, the results and the outcomes will be provided and updated in the next edition of this report.
