From an aware worry to a conscious strategy to fight for a greener world

The results of the European Public Survey of November 2018, aimed to collect the public perceptions on climate change and energy in Europe and Russian and showed clear evidence that citizens do worry about energy security beyond affordable supply and generally find dependence on fossil [...]

A Summer School for a Greener world

Despite the Pandemic emergency the First GrEnFin-Summer School took successfully place, even if we have been forced to held it entirely online. We are glad to say that between the 8th and the 11th of June 2020 we had few intense and incredibly satisfying days of work and collaboration between [...]

European Green Deal, last chance for the planet and the EU?

We are living strange and agitated times, just when Brexit and the migration crisis threatened the identity of the EU, COVID-19 has struck harshly all countries and citizens and turn our lives into this 'new normality'. It is widely accepted that the environmental degradation is related to the origin [...]
